ABOUT

Highly motivated Full Stack Java Developer with proven experience in building scalable web applications, leveraging Spring Boot for robust backend systems and React JS/Tailwind CSS for dynamic frontend interfaces. Adept at developing RESTful APIs, microservices, and secure architectures with a strong emphasis on performance optimization and efficient database management. Successfully delivered multiple real-world projects, including an Ambulance Dispatch Management System and a Mail Validator, demonstrating expertise in full-stack development and a commitment to high-quality, maintainable solutions.

WORK EXPERIENCE

Java Developer Intern | Badkul Technology Pvt. Ltd.

Sep 2025 - Oct 2025, Remote, India, India

Developed and maintained a RESTful Trip Management System backend using Spring Boot, Hibernate (JPA), and MySQL, efficiently handling travel data and optimizing system performance.

- Designed and developed a robust RESTful Trip Management API, enabling efficient handling, search by destination, and filtering by status for complex travel data.
- Optimized API responses by integrating pagination and sorting functionalities, significantly enhancing data retrieval performance for large datasets.
- Improved API robustness and testability through implementing custom validation, global exception handling, and comprehensive Swagger API documentation.
- Achieved an A+ performance grade for technical excellence and professional conduct, demonstrating high-quality work and strong problem-solving skills during the internship.

Intermediate Java Developer Intern | FlexiSAF Edusoft Limited

May 2025 - Aug 2025, Lagos, Lagos State, Nigeria

Contributed to backend development initiatives, building RESTful APIs and system logic using Java, Spring Boot, and MySQL within an agile environment to deliver streamlined, high-performance solutions.

- Developed a web-based Ambulance Service Provider using Spring Boot, Thymeleaf, and MySQL, successfully streamlining patient requests and optimizing dispatch efficiency.
- Reduced dispatch delays to a 30-minute guarantee by implementing secure role-based authentication via Spring Security and designing advanced ETA-based assignment logic.
- Minimized system downtime and enhanced debugging efficiency by engineering robust error-handling and logging mechanisms across the application.
- Automated email notifications, cutting manual follow-up efforts by 40% and significantly improving patient update consistency.
- Achieved a 25% reduction in system response time through strategic optimization of database schema and Hibernate Queries.

PROJECTS

Full Stack WhatsApp Clone (Version 1)

Oct 2025 - Oct 2025

Developed a full-stack WhatsApp Clone (v1) in 3 days, featuring real-time chat, user authentication, online/offline status, AI assistant integration, and real-time translation for multilingual communication. Fully containerized with Docker, improving deployment speed by 40% and demonstrating rapid prototyping and scalability.

Job Tracker Application

Sep 2025 - Sep 2025

Spearheaded the development of a microservices-based job application tracking system using Java Spring Boot, enhancing system performance by 3% as validated through load testing and monitoring metrics

AgroScan

May 2025 - May 2025

Built the backend system for an AI-powered crop disease diagnosis platform using Python (Django), integrating the machine learning model developed by the data science team through RESTful APIs for image upload and prediction retrieval.

Verifact (Fact-Checking Application)

Apr 2025 - Apr 2025

Collaborated with a cross-functional team to design and deliver a web-based fact-checking application by building the backend system using Spring Boot and MySQL, including RESTful APIs, authentication, and data management features

Mail Validator System

Feb 2025 - Feb 2025

Developed a Spring Boot application to efficiently validate email addresses, increasing user authenticity by 40% and reducing fake or disposable email signups by 35%, thereby strengthening overall system security. Building the frontend with React JS and Tailwind CSS, and the backend with Spring Boot.

Deen Wise

Jul 2024 - Jul 2024

Built both the frontend and backend of Deenwise, a web platform that empowers users to learn the Quran interactively, using Spring Boot, Thymeleaf, JavaScript, and Tailwind CSS for a seamless learning experience.

EDUCATION

Electrical/Electronic Engineering | University of Lagos | Bachelor

Lagos, Lagos State, Nigeria, Nov 2024 - Present

Secondary School Certificate | Grano Model College

Abeokuta, Ogun, Nigeria, Jan 2020 - May 2022

SKILLS

Programming Languages | Java, Python, JavaScript, HTML, CSS

Backend Development | Spring Boot, Spring, Django, Hibernate (JPA), Servlet, RESTful APIs, Microservices, Spring Cloud Gateway, Feign Clients, Eureka Service Discovery

Database Management | MySQL, PostgreSQL, Cloud Databases, Database Schema Optimization, Hibernate Queries

DevOps & Cloud | Docker, Render, Containerization, Cloud Deployment, Git, GitHub

Security | Spring Security, JWT Authentication, Role-Based Access Control (RBAC), Secure Coding Practices

Tools & Methodologies | Postman, IntelliJ, Eclipse, Swagger, Maven, JUnit, Mockito, Apache Kafka, Real-time Notifications, MVC (Model View Controller), System Thinking, Query Tuning, Caching Strategies, Efficient Resource Management, Error Handling, Logging, Custom Validation, Global Exception Handling, Maintainability, Debugging Efficiency

Core Competencies | Problem-Solving, Teamwork, Collaboration, Innovation, Technical Expertise, Clean Code, Best Practices, Code Storytelling, Documentation

Frontend Technologies | React JS, Tailwind CSS, Thymeleaf, JSP, JSTL

CERTIFICATES

[Java & Problem-Solving Certification](#) | HackerRank

[Software Engineer Intern \(Remote\)](#) | HackerRank

[Java Backend Certificate \(Remote\)](#) | FlexiSAF Edusoft Limited

AWARDS

[Hackathon Winner - Top Project for Verifact](#) | AI Campus Network, University of Lagos

Nov 2025

Awarded Top Project for Verifact, a fact-checking based web application, at the AI Campus Network Demo Hackathon.

[1st Runner-up, Debate & Quiz Competition](#) | University of Lagos (Electrical/Electronics & Computer Engineering Students)

Jan 2025

Achieved 1st Runner-up among 1st - 3rd year Electrical/Electronics & Computer Engineering Students as a first-year student in a unilag engineering competition.

LANGUAGES

English, Japanese
